

TBE VMI Mobile Description – 03/15/12

VMI Mobile is an app that will run on iOS products like the iPhone and iPad, Android, Blackberry (not tested), webOS products (not tested), and Symbian(not tested).

The app works with customer bins as well as products that are flagged as VMI products in TBE. You can use one or the other or both.

The first screen allows you to enter an order or add more customers. By using the menu options you can view loaded bins or products.

You can select which customers are active. Bins for the selected customers will be updated at this time. If you are including products they will also be updated at this time.

To submit an order just select “Submit Order” from the menu and the order will be posted to be ready for download with TBE. A notification email will be sent so they will know to get the order. Auto order import is coming soon where there is no user interaction to get the order into TBE. TBE can be set to print a pick ticket or acknowledgment automatically at the time the order is submitted.
